Local SEO & Google reviews

Help nearby customers find your business and build trust through accurate local information and a consistent review process.

This brief outlines a proposed engagement. Scope, fees, and delivery dates are confirmed after reviewing your requirements and existing systems.

BUSINESS OBJECTIVE

Improve the path from local search to a qualified inquiry, and make requesting and responding to reviews part of completed service.

PROPOSED SCOPE

- Improve Google Business Profile information, service areas, and relevant local service pages.
- Prioritize local search improvements and consistent business details.
- Request Google reviews after agreed service events using the same eligibility rules for all customers.
- Prepare review-response drafts for approval and track local inquiries alongside review activity.

CLIENT REQUIREMENTS

- Business Profile access, locations, service areas, and accurate service details.
- Website access, existing search reporting, and available inquiry attribution.
- Completed-job records, contact permissions, review link, and response approver.

Implementation and review

Local SEO & Google reviews

OPERATIONAL WORKFLOW

01 Review the current business profile, local pages, and sources of qualified inquiries.

02 Make approved improvements to business information and relevant search content.

03 After eligible completed work, send the agreed review request through a permitted channel.

04 Staff review response drafts; reporting tracks search inquiries and the review process.

ACCEPTANCE CRITERIA

- Agreed business information and local content changes are accurate and approved.
- Review requests use consistent eligibility without screening for expected sentiment.
- Duplicate requests are prevented and review responses follow the approval process.

PERFORMANCE MEASURES

- Qualified local inquiries and attributed booked work.
- Eligible customers invited, review recency, and response time.

COST CONSIDERATIONS

- Locations, local content needs, and current profile condition.
- Job-system integrations, request volume, reporting, and maintenance.

DISCOVERY QUESTIONS

01 Which services and areas should local customers find you for?

02 How do you know a job is complete and a review request is appropriate?

03 Who approves business information and public review responses?

Discuss the scope
