Custom software & workflow automation

Organize sales, bring customers back, and reduce repetitive admin with CRM setup, follow-up workflows, and custom software.

This brief outlines a proposed engagement. Scope, fees, and delivery dates are confirmed after reviewing your requirements and existing systems.

BUSINESS OBJECTIVE

Help your team move opportunities toward booked work and repeat business while recovering time spent on routine administration.

PROPOSED SCOPE

- CRM setup or cleanup: contacts, pipeline stages, next actions, ownership, and agreed connections.
- B2B outreach and appointment workflows: reviewed messages, reply tracking, qualification, and supported booking.
- Customer retention: email reminders, rebooking, and reactivation; optional SMS with a configured sender and opt-in contacts.
- Quote drafts, onboarding, reporting, and data transfer between compatible business applications.
- Custom AI tools, internal dashboards, client portals, or knowledge assistants using approved sources.
- Workflow consulting, staff documentation, action approvals, exception handling, and launch checks.

CLIENT REQUIREMENTS

- Current CRM or workflow, representative records, business rules, and the outcome to improve.
- Application access, approved contact permissions, sender setup, and integration requirements.
- Data owners, action approvals, examples of exceptions, and baseline time or sales measures.

Implementation and review

Custom software & workflow automation

OPERATIONAL WORKFLOW

01 A staff request or agreed business event starts the process.

02 The system retrieves permitted information and prepares the answer, draft, or update.

03 Staff review designated actions; missing or conflicting information is referred to its owner.

04 Approved work reaches the agreed tools, with a record and instructions for exceptions.

ACCEPTANCE CRITERIA

- Representative tasks produce the agreed output and preserve required approvals.
- Knowledge answers reference approved sources and respect user access permissions.
- Missing information, repeated events, and failed connections follow documented recovery steps.

PERFORMANCE MEASURES

- Staff hours recovered after review, corrections, and maintenance.
- Qualified meetings, repeat bookings, pipeline progress, and attributable completed work.

COST CONSIDERATIONS

- Process complexity, custom interfaces, and connected applications.
- Source preparation, permission requirements, usage, and support.

DISCOVERY QUESTIONS

01 Where do leads, past customers, or repeated admin need better follow-through?

02 Which CRM, calendar, and business tools does your team already use?

03 Who approves contact lists, messages, and actions before launch?

Discuss the scope

Email gavin@schurrautomations.com or call Gavin at (985) 232-8337. Use this brief to discuss your systems, required changes, and goals.
