Websites & chatbots

Build a website for your service business that explains your offer and makes inquiries, quotes, and appointments easier.

This brief outlines a proposed engagement. Scope, fees, and delivery dates are confirmed after reviewing your requirements and existing systems.

BUSINESS OBJECTIVE

Help suitable customers move from browsing your website to a useful inquiry, with an experience that works on desktop and mobile.

PROPOSED SCOPE

- A specialized service-business website, an existing-site improvement, a chatbot, or a combination.
- Industry-specific service pages, responsive layouts, inquiry or booking actions, and search metadata.
- Website chat using approved information, with lead capture and staff handoff.
- Chatbot answer and handoff testing, content maintenance, and agreed connections to lead response.

CLIENT REQUIREMENTS

- Brand assets, service details, page content, and existing website access.
- Approved chatbot sources, common questions, and staff handoff instructions.
- Hosting arrangements, inquiry fields, and any CRM or booking connections.

Implementation and review

Websites & chatbots

OPERATIONAL WORKFLOW

01 A visitor finds the relevant service page or asks a question in website chat.

02 The website explains the service; chat answers from approved business information.

03 The visitor submits an inquiry or requests the supported next step.

04 Details reach the agreed staff destination or a connected lead-response workflow.

ACCEPTANCE CRITERIA

- Pages and inquiry paths work on the agreed mobile and desktop sizes.
- Chat tests cover routine questions, missing information, unsupported claims, and handoff.
- Submitted details reach the correct destination; your team can maintain the approved content.

PERFORMANCE MEASURES

- Completed inquiries and qualified contacts by traffic source.
- Mobile performance, answer accuracy, and successful staff handoffs.

COST CONSIDERATIONS

- Page count, content preparation, and existing site complexity.
- Chat usage, integrations, hosting, testing, and maintenance.

DISCOVERY QUESTIONS

01 Does your current site need replacing, improving, or simply a chatbot?

02 What do customers need to know before they contact you?

03 Where should an inquiry go after the visitor submits it?

Discuss the scope

Email gavin@schurrautomations.com or call Gavin at (985) 232-8337. Use this brief to discuss your systems, required changes, and goals.

Downloading this brief does not submit an inquiry or confirm a project.
